

AIMSS invites you to our seminar featuring our guest speaker:

Professor Marie-Claude Gregoire “Molecular Imaging and ANSTO Capabilities to Investigate Musculoskeletal Disease”

Marie-Claude Gregoire is the Leader of the Human Health Research at ANSTO, which aims at optimizing and using Nuclear Technologies to deliver better health through improved environmental, preventive and therapeutic strategies. Prof Gregoire is the co-director of the newly established ANSTO Graduate Institute, at the heart of ANSTO Innovation Precinct. Her expertise and main research field is the functional exploration of biological pathways with complementary nuclear techniques and multi-modality imaging to investigate mechanisms of disease development and therapy.

Tuesday 20th August 2019

5.00-6.00pm

(followed by networking refreshments)

Western Centre for Health Research and Education (WCHRE)

Auditorium – Level 1

176 Furlong Road, St. Albans, VIC

Enquires: mark.gregory@unimelb.edu.au
